

# Physics 23 I

## Physics for Future Presidents

### Professor Gene Sprouse

### Fall 2016

**Course Description:** The aim of this course is for you to learn how science attacks the *most* important societal issue facing our planet.

**Specific objectives are:**

- To understand the fundamental science of energy and energy usage in the world, and the human impact on the global climate.
- To learn, through the process of discovery, how science formulates questions and addresses them with reasoning, evidence, and argumentation.
- To address specific questions which must be asked and answered in order to understand the important societal questions of energy usage and environmental impact.
- To learn about other issues with a strong physics content such as satellites, space, quantum devices.

At the completion of the Course you should have improved ability to:

1. Look at complex questions and identify the science in the question and how it impacts and is impacted by political, social, economic, and ethical dimensions
2. Understand the limits of scientific knowledge
3. Critically evaluate science arguments
4. Ask good questions
5. Find information using various sources and evaluate the veracity of the information
6. Communicate scientific ideas effectively
7. Relate science to a personal situation

**Clickers:** We will be using clickers

**Classes:** Lecture: Tu-Th 1:00-2:20pm in MELVILLE LBR W4550

**Attendance:** This class will be interactive, with in-class group activities and responses. Your attendance is critical to your success. Participation in class discussions will be part of your grade.

**Reading:** There will be reading assignments to be completed *before* each class, and sometimes a short assignment (typically a short answer to a single question) related to the reading. There will be discussion related to the reading in class, so be sure to do your reading – you may be asked about it!

**Homework:** There will be two components to the homework. Each week you will find and submit a link to a relevant article in the media. Be prepared to summarize and discuss in class. Here is a link to a large number of interesting sources compiled by a Carnegie Mellon Professor: <https://www.andrew.cmu.edu/course/33-115/resources.html> Some of these items require a subscription, but you can get them through the Stony Brook

Library site.

Other homework will be assigned approximately every other week. Homework handed in late will be normally not be accepted, except for the major projects, that will have late penalties of one grade level/day.

**Project:** There will be a group project and one term project for the semester. The term project will be an opportunity for you to go into a subject that interests you that is related to the course, and do some research and analysis. More details will be announced later.

**Important Dates:**

First class	August 29	
No Class	September 6	
Midterm exam 1	October 4	<i>Subject to change</i>
Midterm exam 2	November 15	<i>Subject to change</i>
Last class	December 9	
Final Exam	December 19	5:30-8:00pm

If you have a reason why you cannot attend class (religious holiday, official University business), see me before the exam! Only medical emergencies will be considered as excuses after the exams. If you miss an exam with a valid excuse, a makeup exam will be given.

**Extra Help:** I will be available at the end of each lecture to answer questions, or come to my office hours. Please seek help at the first sign of difficulties or confusion.

**Grading:** Your grade will be based on the following:

Midterms	25%
Project	20%
Homework(URL Link submissions)	10%
Homework(Problems)	10%
Class Participation*	10%
Final Exam	25%

\*Clickers are required and will be used *in part* to assign Participation grades.

**Academic Integrity**

**Disabilities:** If you have a documented disability and wish to discuss accommodations, please contact me as soon as possible.

**Helpful tips:**

- 1) **Read the assignments** *before* class and refresh yourself after.
- 2) **Do the homework.** There will be approximately 7 homework assignments. You may collaborate on homework assignments, but you will be responsible for producing your own work.
- 3) **Attend class.** Classes will be interactive with a mix of lecture, group activities, demonstrations, and discussion. Clickers will be used in part to measure class participation.

4 )**Talk to your classmates.** Trying to explain something to someone else is often the best way for you to fully understand the concept.

5) **Ask questions in class.** There are no stupid questions – only ones you don't ask.

**DISABILITY SUPPORT SERVICES (DSS) STATEMENT:**

If you have a physical, psychological, medical or learning disability that may impact your course work, please contact Disability Support Services, ECC (Educational Communications Center) Building, room128, (631) 632-6748. They will determine with you what accommodations, if any, are necessary and appropriate. All information and documentation is confidential.

**ACADEMIC INTEGRITY STATEMENT:**

Each student must pursue his or her academic goals honestly and be personally accountable for all submitted work. Representing another person's work as your own is always wrong. Faculty are required to report any suspected instances of academic dishonesty to the Academic Judiciary. For more comprehensive information on academic integrity, including categories of academic dishonesty, please refer to the academic judiciary website at <http://www.stonybrook.edu/uaa/academicjudiciary/>

**CRITICAL INCIDENT MANAGEMENT**

Stony Brook University expects students to respect the rights, privileges, and property of other people. Faculty are required to report to the Office of Judicial Affairs any disruptive behavior that interrupts their ability to teach, compromises the safety of the learning environment, or inhibits students' ability to learn.
